AI / LLM APIs

Production-grade AI inference — chatbots, coding assistants, document processing, embeddings

Google Gemini API (AI Studio)

FREE KEY

Sabse generous free LLM tier in 2026. Gemini 2.5 Flash frontier model, 1M token context window, multimodal support (text + images). Small chatbots, document pipelines, content generation — sab free mein run hota hai. No credit card required.

RATE LIMIT
1,500 req/day

Best Affordable APIs for Production Projects (2026)

1. AI / LLM APIs

Google Gemini API

Open Link: <https://ai.google.dev>

Google Gemini provides powerful multimodal AI models with highly affordable pricing. Gemini 2.5 Flash costs around \$0.30 per million input tokens and \$2.50 per million output tokens. Gemini Flash models are optimized for speed and low-cost production applications.

Best For

- AI chatbots
 - Content generation
 - Document analysis
 - AI assistants
 - Educational tools
-

Key Features

- Multimodal support (text, image, video)
- Fast inference speed
- Generous free tier
- Scalable infrastructure

Mistral AI API

Open Link: <https://mistral.ai/api>

Mistral AI offers some of the cheapest high-performance language models available in 2026. Mistral Small models are excellent for high-volume production workloads at extremely low costs.

Best For

- Text summarization
- Classification systems
- Large-scale automation
- AI SaaS products

Key Features

- Very affordable pricing
- Fast response times
- Open-weight model ecosystem
- Strong multilingual support

DeepSeek API

Open Link: <https://platform.deepseek.com>

DeepSeek has become one of the most popular APIs for coding and reasoning tasks due to its strong performance-to-cost ratio.

Best For

- Coding assistants
- AI development tools
- Reasoning systems
- Technical AI products

Key Features

- Excellent code generation
 - Strong reasoning capability
-

-
- Budget-friendly pricing
 - Developer-focused ecosystem

OpenAI API

Open Link: <https://platform.openai.com>

OpenAI provides industry-leading AI models with flexible pay-as-you-go pricing and excellent developer tooling.

Best For

- AI chat applications
- Structured outputs
- Function calling
- Enterprise AI integrations

Key Features

- Reliable infrastructure
- Advanced reasoning models
- Huge developer ecosystem
- Excellent documentation

Anthropic Claude API

Open Link: <https://console.anthropic.com>

Claude API is well known for long-context processing and document analysis. Prompt caching significantly reduces production costs.

Best For

- Long-document analysis
- Code reviews
- Enterprise AI workflows
- Research tools

Key Features

- Very large context windows
 - Strong safety alignment
 - High-quality reasoning
 - Efficient prompt caching
-

2. Email APIs

Resend

Open Link: <https://resend.com>

Resend is one of the best modern transactional email APIs for developers.

Best For

- OTP systems
- Welcome emails
- Notifications
- SaaS products

Key Features

- Developer-friendly API
- Free monthly email quota
- React email support
- High deliverability

3. Authentication APIs

Clerk

Open Link: <https://clerk.com>

Clerk simplifies authentication with prebuilt components and advanced security features.

Best For

- Next.js applications
- React projects
- SaaS platforms
- User management systems

Key Features

- Multi-factor authentication
 - User profiles
 - Organization management
 - Ready-made UI components
-

Firebase Authentication

Open Link: <https://firebase.google.com>

Firebase Auth provides scalable authentication with easy integration into mobile and web applications.

Best For

- Mobile apps
- Startup MVPs
- Rapid prototyping
- Full-stack apps

Key Features

- Multiple login providers
- Scalable infrastructure
- Generous free tier
- Easy SDK integration

4. Maps & Location APIs

OpenRouteService

Open Link: <https://openrouteservice.org>

OpenRouteService is an excellent routing and navigation API built on OpenStreetMap data.

Best For

- Delivery applications
- Navigation systems
- Logistics platforms

Key Features

- Free daily requests
- Route optimization
- Geocoding support
- Open-source ecosystem

IPStack

Open Link: <https://ipstack.com>

IPStack provides IP geolocation services for personalization and fraud detection.

Best For

- Geo-targeting
- Fraud prevention
- Analytics systems
- Content personalization

Key Features

- Real-time geolocation
- IPv4 and IPv6 support
- Fast lookup speed
- Security insights

5. Web Search APIs

Serper

Open Link: <https://serper.dev>

Serper provides Google-quality search results through a simple API.

Best For

- AI search systems
- SEO tools
- Research assistants
- Search-powered apps

Key Features

- Fast results
- Affordable pricing
- Search scraping abstraction
- Easy integration

Brave Search API

Open Link: <https://api.search.brave.com>

Brave Search API is privacy-focused and offers a genuinely useful free tier.

Best For

- Privacy-focused applications
- Indie projects
- AI agents

Key Features

- Independent search index
- Free monthly quota
- Privacy-first approach
- Clean API responses

6. Finance APIs

Marketstack

Open Link: <https://marketstack.com>

Marketstack offers stock market and financial data APIs.

Best For

- Portfolio trackers
- Financial dashboards
- Trading applications

Key Features

- Real-time stock data
- Historical market data
- Easy REST API
- Global exchanges support

Fixer API

Open Link: <https://fixer.io>

Fixer provides foreign exchange rates and currency conversion APIs.

Best For

- E-commerce applications
 - International payments
 - Currency converters
-

Key Features

- Real-time forex rates
- Historical exchange data
- Lightweight API
- Reliable uptime

7. News APIs

NewsAPI

Open Link: <https://newsapi.org>

NewsAPI aggregates headlines and news articles from multiple publishers.

Best For

- News dashboards
- AI news summarizers
- Media applications

Key Features

- Topic filtering
- Country filtering
- Search support
- Simple REST API

8. Validation APIs

Mailboxlayer

Open Link: <https://mailboxlayer.com>

Mailboxlayer validates email addresses and helps reduce spam and fake registrations.

Best For

- Form validation
- Fraud prevention
- CRM systems

Key Features

-
- SMTP verification
 - Disposable email detection
 - Syntax validation
 - Bulk validation support

Numverify

Open Link: <https://numverify.com>

Numverify validates phone numbers globally.

Best For

- User verification
- Fraud prevention
- SMS systems

Key Features

- International number validation
- Carrier lookup
- Location detection
- Real-time verification

9. API Discovery Platforms

RapidAPI

Open Link: <https://rapidapi.com>

RapidAPI is one of the largest API marketplaces with thousands of APIs in one platform.

Best For

- API discovery
- Rapid development
- Multi-service integration

Key Features

- Unified billing
 - Massive API marketplace
 - API analytics
 - Easy testing tools
-

Public APIs GitHub Repository

Open Link: <https://github.com/public-apis/public-apis>

A massive community-maintained collection of free public APIs.

Best For

- Learning projects
- API exploration
- Startup prototypes

Key Features

- Thousands of APIs
- Open-source community
- Multiple categories
